Data & Business Analyst with 10 years of experience managing end-to-end data lifecycles, gathering business requirements, and delivering qualitative and quantitative insights for executive leadership. Proven track record in maintaining rigorous data quality controls, root cause and anomaly detection, and leading UAT within regulatory and compliance frameworks to drive strategic decision-making.

Skills

- **Data & BI:** SQL, Python (Pandas, NumPy), Snowflake, Power BI (DAX), Tableau, Advanced Excel & Power Query
- **AI & Automation:** Copilot Studio, Power Automate, AI Agents, Generative AI
- **Engineering & Analytics:** ETL Pipelines, Relational Data Modeling, Statistical Analysis, Anomaly Detection
- **Governance, Operations & BA:** Requirements Gathering (BRD/FRD), Functional Requirements, Stakeholder Management, Process Analysis, UAT, Gap Analysis, Agile/Scrum, Process Optimization, Data Quality Auditing, Regulatory Compliance

Experience

Senior Process Associate at Thomson Reuters

Feb 2018 - Aug 2026

- **Analytics & Automation Impact:** Conceptualized and built an end-to-end custom automation agent in Microsoft Copilot Studio to monitor external regulatory data streams; implemented delta-detection logic to programmatically identify format or textual anomalies against historical compliance repositories, reducing downstream errors by 25%.
- **Data Architecture & Analytical Design:** Advanced visual data architecture and tax schema generation; blended structural proofreading with legislative analysis to align form logic exactly with complex regulatory requirements.
- **Requirements Gathering & Regulatory Modeling:** Partnered with cross-functional stakeholders to translate US/CA statutory mandates into functional business requirements (BRDs), designing and mapping high-compliance schema templates across GoSystem Tax RS, Elixir, and DesignPro.
- **Data Ingestion & UAT Audits:** Extracted, transformed, and keyed 1,000+ complex regulatory forms and datasets per season into production environments, leading recursive UAT cycles and QA audits to eliminate downstream reporting defects.
- **Release Pipeline & Trend Monitoring:** Tracked form approval lifecycles, batch releases, and vendor data outputs (PCL/WMF) to resolve bottlenecks and secure 100% on-time deployment.

Assistant Editorial Manager OMICS INTERNATIONAL PVT LTD

July 2016 - January 2018

- **Workflow Analysis & Process Optimization:** Directed high-volume reporting and operational workflows, conducting gap analyses and applying statistical controls and data validation to tracking matrices, peer-review pipelines, and digital publishing indices.
- **Data Reporting & Narratives:** Extracted data metrics to write and present executive summaries, operational tracking reports, and clear performance dashboards for cross functional stakeholders.

Projects

- **Healthcare Readmission Analytics:** Built an end-to-end analytical pipeline using SQL, Python, and Tableau to identify high-risk clinical factors and forecast 30-day patient readmissions, empowering providers to reduce care costs.
- **Financial Fraud Detection:** Analyzed transaction anomalies and demographic patterns using SQL, Python, and geospatial Tableau dashboards to detect suspicious credit card activity and mitigate financial risk.
- **Customer Purchase Behavior & Retail Analytics:** Analyzed retail transaction data and demographic trends using SQL, Python, and Tableau to forecast campaign responsiveness and optimize promotional strategies for maximum marketing ROI.
- **Crime Pattern & Geospatial Analysis:** Developed an interactive Tableau intelligence dashboard evaluating multi-year crime trends, arrest rates, and spatial hotspots to optimize police resource allocation and tactical planning.
- **Automated Triage Agent (Copilot Studio & Power Automate):** Architected an end-to-end workflow utilizing Power Automate to extract web data, cross-reference compliance anomalies, and route automated alerts to human-in-the-loop systems.

Certification

- Professional Certificate Program in Data Analytics & Generative AI – IIT Guwahati (2026)
- Complete Guide to Power BI for Data Analysts by Microsoft Press (2026)
- Intro to Snowflake for Devs, Data Scientists, Data Engineers (2026)

Education

HALDIA INSTITUTE OF TECHNOLOGY

- Bachelor of Engineering
- Major in Biotechnology

2012 - 2016
